SUMMARY

Analytics and Data Engineering professional with 4+ years delivering commercial insights and data products across healthcare and retail. Specialize in segmentation and targeting, marketing monetization, and end-to-end ETL/ELT from RDBMS to data warehousing, deploying production-grade pipelines and dashboards using Python/SQL on GCP/Azure

WORK EXPERIENCE

Albertsons Companies

May 2025 - Present

Data Engineer (Merchandising & Marketing Analytics)

- Delivered the production data pipeline for transactional email monetization toward a \$9M annual CPG revenue target, establishing tracking-ready datasets and API-backed reporting hooks
- Shipped and deployed daily NFPT projection ETL pipelines processing 10M+ transactional records into a governed data warehouse (RDBMS/BigQuery), enabling category performance reporting and planning across 12 divisions
- Led a cross-functional workstream with architects to operationalize a scenario-based projections workflow for 20 Albertsons banners, enabling faster performance-driven adjustments
- Spearheaded a price elasticity POC across 10 categories; built an explainable model with RDBMS + data warehouse, ETL, and deployment approach for pricing decisions

H.Y.P.E to Empower Inc.

Feb 2025 - May 2025

Business Analyst (Program Analytics)

- Architected grant discovery tool using Python and Streamlit to identify and track funding opportunities for HIV-focused nonprofit, replacing paid platform and saving \$1,000+ monthly in operational costs
- Optimized grant tracking and management workflows using Python and n8n, reducing manual effort by 80% and improving operational accuracy by 20% across application and reporting processes

Novartis Pharmaceuticals

Jul 2022 - Aug 2023

Data Engineering & Field Insights Analyst (Commercial Analytics)

- Architected and productionized RLT data pipelines (Snowflake, AWS, Python, Alteryx) processing ~2TB/day, translating requirements into technical design and supporting test/UAT and SLA-based operations (~90% SLA)
- Orchestrated RLT segmentation and targeting analytics, converting adoption and opportunity signals into prioritized HCP lists and territory-level insights to drive go-to-market execution
- Operationalized incentive compensation analytics by linking field sales performance to IC metrics, improving goal-attainment transparency and accelerating monthly/quarterly IC cycles
- Automated and fortified ingestion and data quality validation across 30+ distributors and 27 vendors, mentoring a team of 3 junior analysts to improve timeliness and reduce downstream reporting defects

IQVIA (Quintiles and IMS Health)

Aug 2020 - Jul 2022

Data Strategy Analyst (Healthcare Analytics)

- Identified treatment switching patterns across 500K+ patient records for F-500 pharma brands (Amgen, Sanofi, UCB, Novartis), pinpointing market drivers that shaped commercial strategy for 15+ products
- Engineered real-time pharmacy tracking system capturing prescription trends, enabling sales teams to pivot territory strategies within days instead of weeks
- Delivered 40+ automated Power BI and Tableau dashboards, eliminating 20+ manual hours monthly and accelerating report delivery from one week to 24 hours
- Optimized campaign measurement across 14 territories using claims and sales data, aligning KPIs for 10+ stakeholders and reducing GDPR validation cycles by 15%

EDUCATION

Boston University, Questrom School of Business: M.S. in Business Analytics (Healthcare Analytics)

Jan 2025

National Institute of Technology, India: B-Tech in Engineering

May 2020

TECHNICAL SKILLS

Data Engineering & Cloud: Python, SQL, Databricks, Snowflake, Spark, Kafka, AWS, GCP, Azure, RDBMS (MySQL)

Analytics & ML: Power BI, Tableau, Streamlit, scikit-learn, A/B testing, XGBoost, LangChain, CrewAI, RAG pipeline

Development & Tools: Git, Docker, Flask/FastAPI, CI/CD, JIRA, Agile/Scrum, Alteryx, Data Structures & Algorithms
